

BUSTY ADVENTURES

Main Review Text:

Busty Adventures is on of the Bang Bros Network member sites and has the same sort of quality porn we've come to expect from them.

Welcome to the world of busty babes showing off their big cup breasts in a realistic setting. The girls on Busty Adventures are all beautiful, big boobed babes that love a hardcore fucking. You'll find blondes, brunettes, red heads, Asians, Latinas, blacks, and on and on.

The site has been around for several years now, updating regularly with exclusive, self-produced content. As a result they have quite the library with several hundreds of videos. Video comes in WMV and MPEG formats, can be downloaded as one complete file, a series of large clips, or a series of 1 min clips. Quality is top notch in all shots with great lighting, sexy models, and a good hi res image.

In the past year or so they've begun to offer high quality pictures of each scene as well. You can browse through the large set for each episode, but there are no options for downloading them as a single ZIP file, which would be a nice addition in the future.

A clean website with great design points and functionality does a great job of showing off the Busty Adventure's content, of which there is quite a bit. Videos are organized by updates and you can search the model database to find the girls you like best. Bios and a list of all Busty Adventure episodes they appear in are included, so you can get all their content quickly.

Busty Adventures also has a great set of interactive features for their members. Vote on models and episodes, see what scenes are the most popular of the week or all time, and which ones have gotten the highest marks. This is a great feature that helps new members jump right in to the intimidating library.

Pros:

- Sexy busty babes in every scene.
- Massive collection that keeps growing.
- Good website organization and features.

Cons:

- No ZIP file for photos.
- Some problems with download managers.

Summary:

Busty Adventures is a great big boob site with a large library of content and an easy to use website that makes finding it easier. Among the other Bang Bros Network sites, this one probably stands out the least. The content is pretty predictable and while the models are generally very hot, some sites do a little better job as far as content.

MR CAMEL TOE

Main Review Text:

Mr Camel Toe is a Bang Bros Network site that's all about camel toe pussy. All of their content revolves around girls with this particular style of pussy, and all of them are hot sexy babes in various flavors. Black to white, Asian to Latina, big tits, teen tits, juicy asses, or slim frames. Basically, you'll find just about every kind of girl getting into every kind of hardcore action, always with a profound camel toe in sight.

The site has been around for about 3 years now and thanks to regular updates they've got a nice sized collection. All their content is 100% exclusive (they film it themselves and its not published anywhere else) and usually recorded in HD or hi res formats.

You can download videos in WMV or MPEG formats at different quality compressions. Episodes are available as one large file, a series of big clips, or a series of shot 1 min clips. Photo sets come with each episode as well, these are hi res reasonably sized photos that can be browsed in their online gallery format only. No ZIP file, which we'd really like to see changed in the near future.

The website is clean, sharp, and a clone of all other Bang Bros Network sites. If you've been inside any of them you'll find the same at work here. This is helpful because when you join you get access to the whole network, and you won't have to relearn each website you browse.

Good organization and search functions make finding content easy, and a model directory with bios and lists of each episode they star in is great when you find a favorite girl and want to get all of her episodes quick.

Members can vote and rank models and episodes as well, and Mr Camel Toe keeps track of what content is most popular for the week and for all time, which is a great feature for new members to get right into some good hardcore action.

Pros:

- Network access with membership.
- Nice sized library of exclusive, high quality content.

Cons:

- No ZIP file for photos.
- Some trouble with download managers.

Summary:

Mr Camel Toe is probably the most visible camel-toe niche site on the net and for good reason. Lots of great content, hot girls, and hardcore action keeps members happy and brings in new ones every day. It's a great site and having access to all of the other Bang Bros Network sites is a very sweet bonus.

PUBLIC INVASION

Main Review Text:

Well known for more or less inventing the reality niche in hardcore porn, the Bang Bros Network site "Public Invasion" takes reality to the ultimate level.

Amateur girls and pornstars from around the world get hot and horny while out in the real world, flashing big tits, showing off naked bodies in night clubs, and generally being naughty whores. Their indecent exposure always leads to some hardcore action either on the spot or behind closed doors. You'll find it all here, a variety of models getting fucked, anal reamed, titty banged, and cummed on.

Public invasion has been around a few years, and weekly updates have helped them grow a decent sized collection of video. They've only recently started adding photo sets with the episodes so there is a less-substantial number of those.

The video is in WMV or MPEG format and its all 100% exclusive. Bang Bros produces the content and this is the only publishing outlet for it. You can download episodes as one complete file, a small series of big files, or a large series of 1min clips. When episodes have photo shoots they are a good quality, but can only be browsed online. No ZIP file to download the whole batch.

Like other Bang Bros member areas Public Invasion is pretty solid. Good search functions, organization and design do a good job of serving their content up. I especially like the model directory, where you can browse by the member's ranking or name, or other filters, and find the hot girls you like. Bios and a list of all their episodes are included so if you tend to have favorite girls, you can follow their action without searching the whole catalogue.

You get access to some other Bang Bros network sites, and since they share the same members area it's easy to browse them as well.

Pros:

- Fun, reality content in real public settings.
- Hot babes and well known pornstars doing hardcore action.

Cons:

- No ZIP file for photos.
- Still needs some growth to be on the level of other Bang Bros sites.

Summary:

A newer addition to the Bang Bros Network, Pulic Invasion has a nice sized library but needs some growth. Since new exclusive content is added every week, its just a matter of time. We'd also like to see ZIP files for the photos and a flash stream option for video in the near future.
